

Flowers

Busy Bees

Requirements

1. List five flowers mentioned in the Bible.

2. Identify 10 of the following:

- a. Daffodil
- b. Daisy
- c. Geranium
- d. Tulip
- e. Pansy
- f. Chrysanthemum
- g. Rose
- h. Carnation
- i. Gladiolus
- j. Lily
- k. Iris
- l. Petunia

3. Tell what attracts bees and insects to flowers and what it is they get from flowers.

4. Describe three ways in which flower seeds are scattered.

5. Play a "Pollen Game."

6. Make a bookmark using dried flower petals.

7. Take a bouquet of garden flowers to share with someone.

James 1:10-11

And those who are rich should boast that God has humbled them. They will fade away like a little flower in the field. The hot sun rises and the grass withers; the little flower droops and falls, and its beauty fades away. In the same way, the rich will fade away with all of their achievements.

Luke 12:27

“Look at the lilies and how they grow. They don’t work or make their clothing, yet Solomon in all his glory was not dressed as beautifully as they are

Numbers 17:8

When he went into the Tabernacle of the Covenant the next day, he found that Aaron's staff, representing the tribe of Levi, had sprouted, budded, blossomed, and produced ripe almonds

Almond Blossom

Song of Solomon 2:1-2

I am the rose of Sharon,
And the lily of the valleys.

Job 15:31-33

Let him not trust in futile things, deceiving himself,
For futility will be his reward.

It will be accomplished before his time,
And his branch will not be green.

He will shake off his unripe grape like a vine,
And cast off his blossom like an olive tree.

Olive Blossom

2. Identify 10 of the following:

Daffodil

Daisy

Geranium

Geranium

- Geranium is a genus of 422 species.
- annual, biennial, and perennial plants
- Commonly known as geraniums or cranesbill

Tulips

There are about 75 species, and these are divided among four subgenera.

Tulip flowers come in a wide variety of colours.

In the 15th century, tulips were among the most prized flowers.

The Tulip was the symbol of the Ottomans. In the 16th century, when Western diplomats to the Ottoman court observed and reported on them. They were rapidly introduced into Europe and became a frenzied commodity during Tulip mania.

Pansy

Chrysanthemum

Rose

Petunia

Other flowers

Rafflesia- Largest flower

Titan Arum

Delonix regia

3. a) Tell what attracts bees and insects to flowers?

Colors

Smell

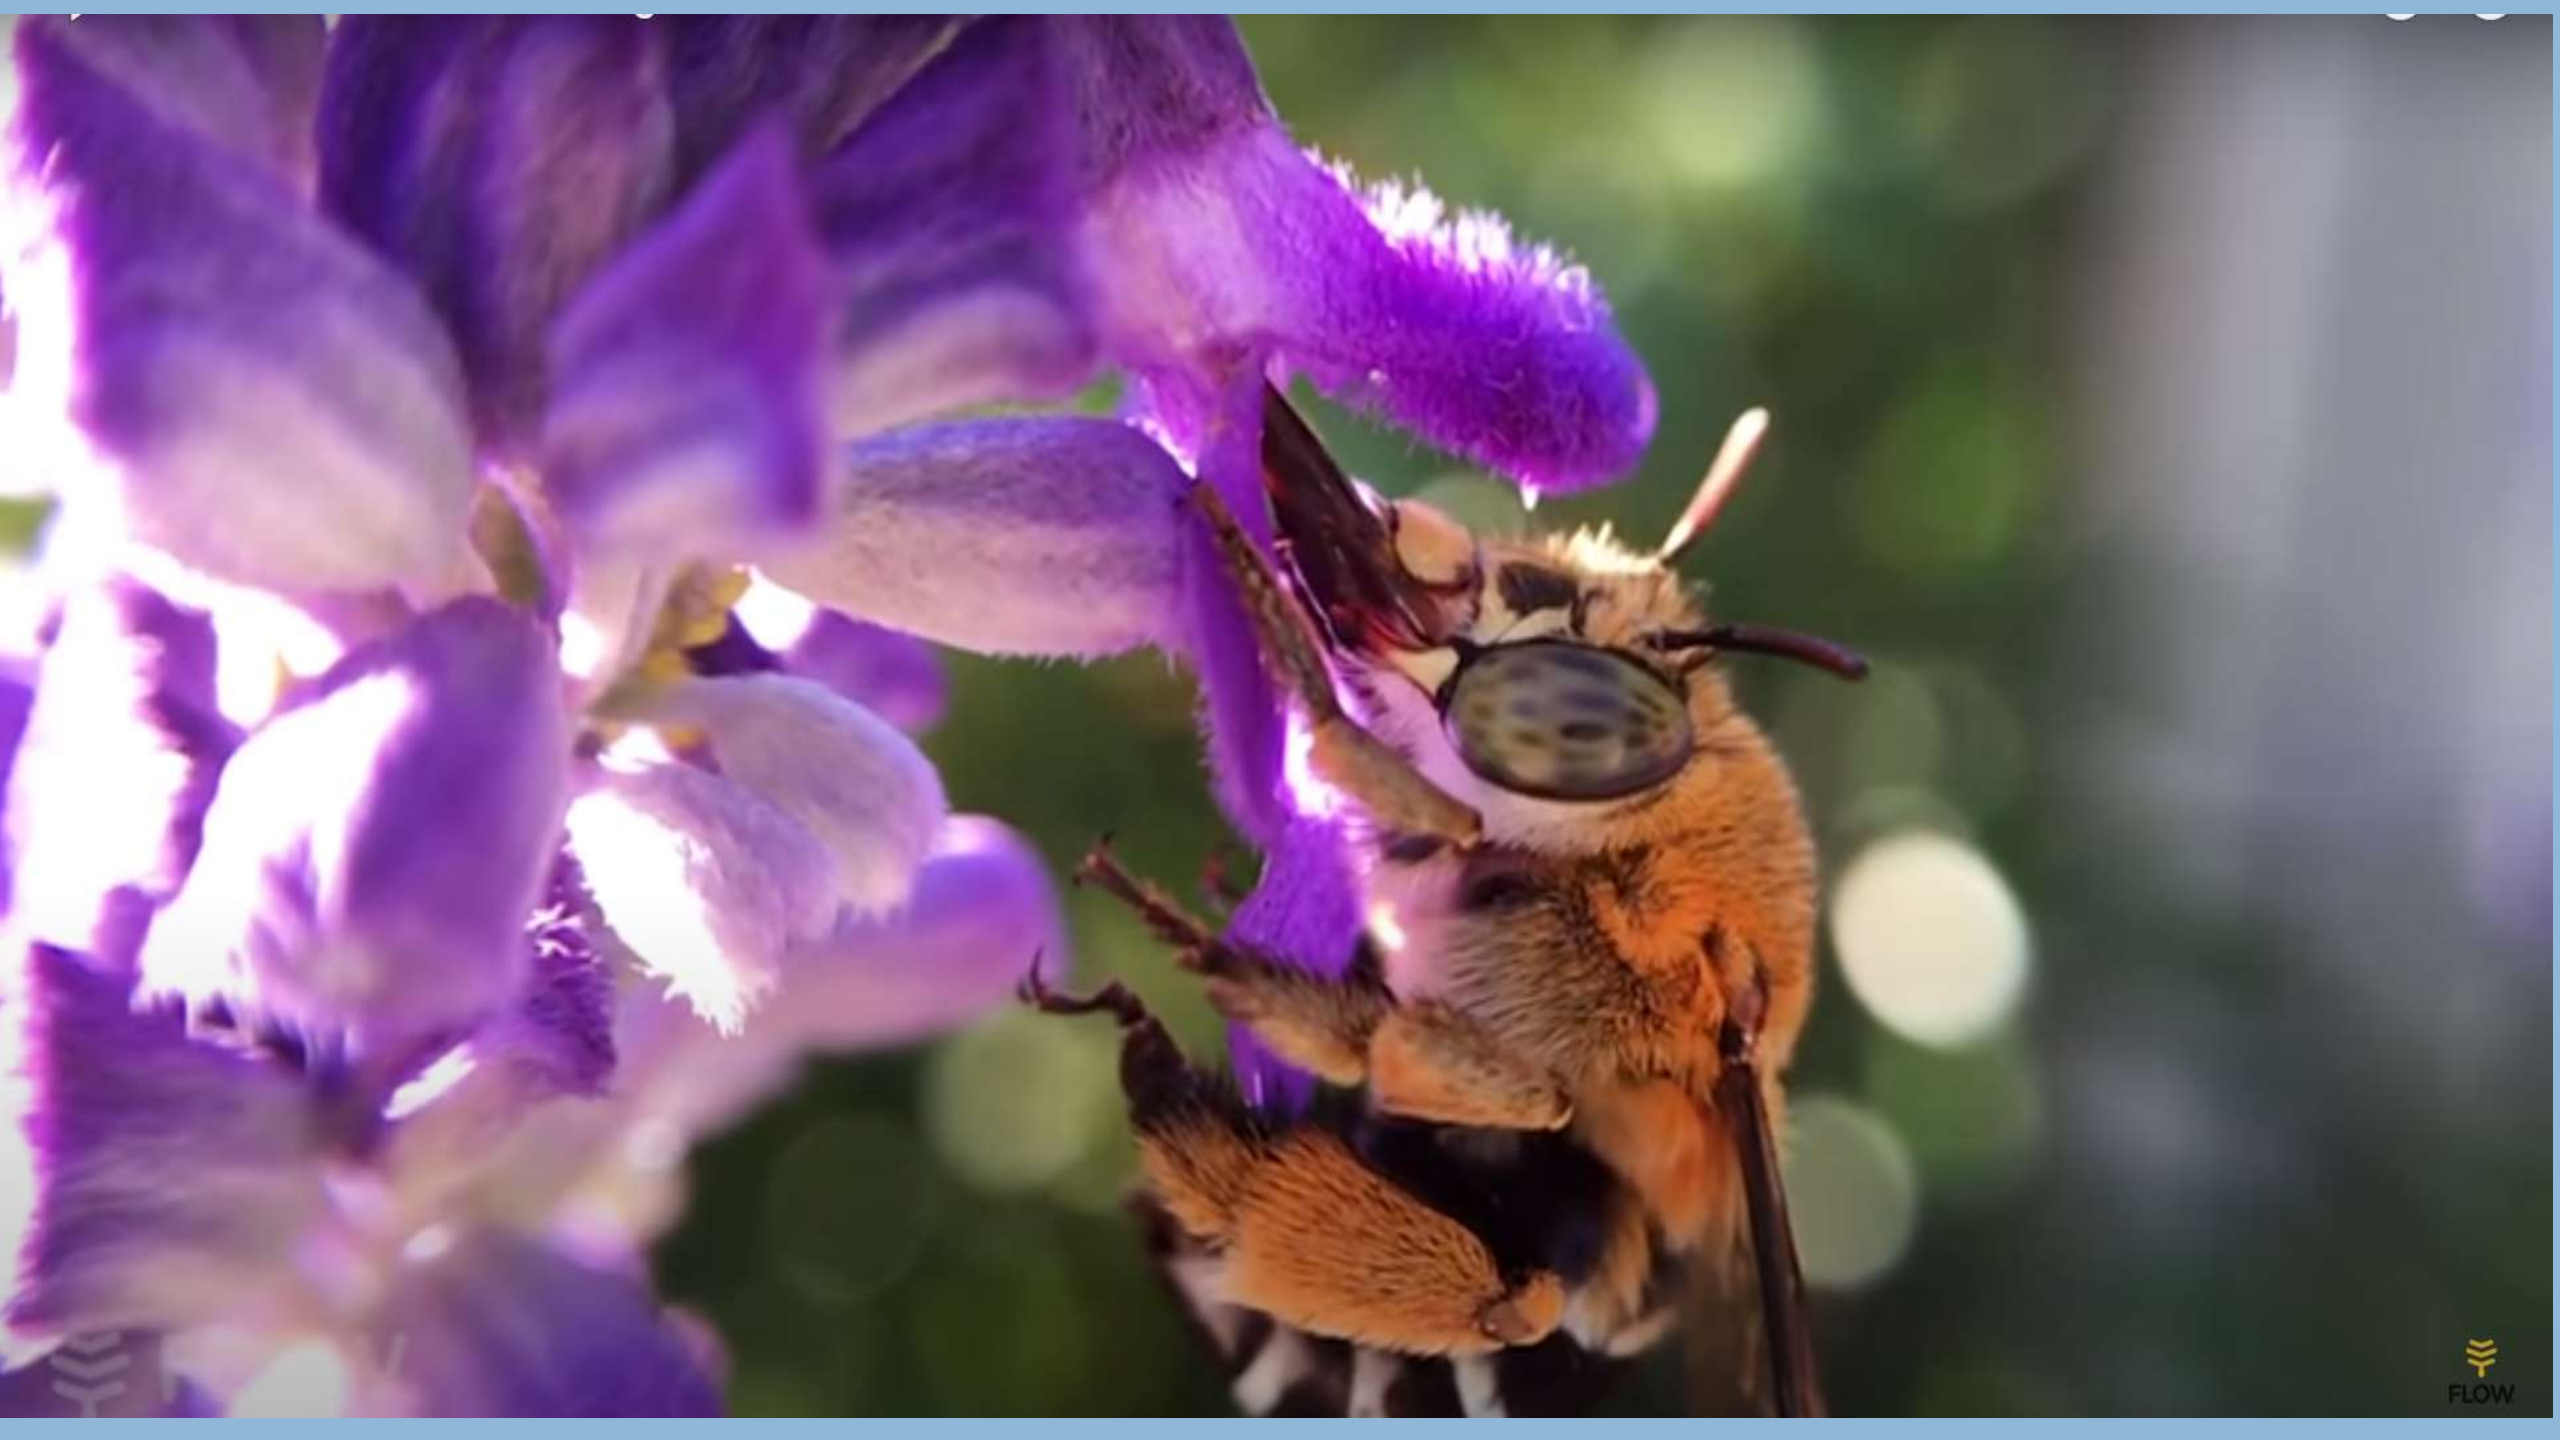

Motion

3. b) what it is they get from flowers.

Nectar

Pollen

Water

4. Describe three ways in which flower seeds are scattered.

Flower seeds are scattered by

Birds

Wind

Insects

Animals.

Birds

Wind Dispersal

- Have you ever blown on a dandelion head and watched the seeds float away? This is wind dispersal. Seeds from plants like dandelions, swan plants and cottonwood trees are light and have feathery bristles and can be carried long distances by the wind. Some plants, like kauri and maple trees, have 'winged' seeds. They don't float away but flutter to the ground. With wind dispersal, the seeds are simply blown about and land in all kinds of places. To help their chances that at least some of the seeds land in a place suitable for growth, these plants have to produce lots of seeds.

Wind Dispersal

Insects

Animals

Fire

5. Play a “Pollen Game.”

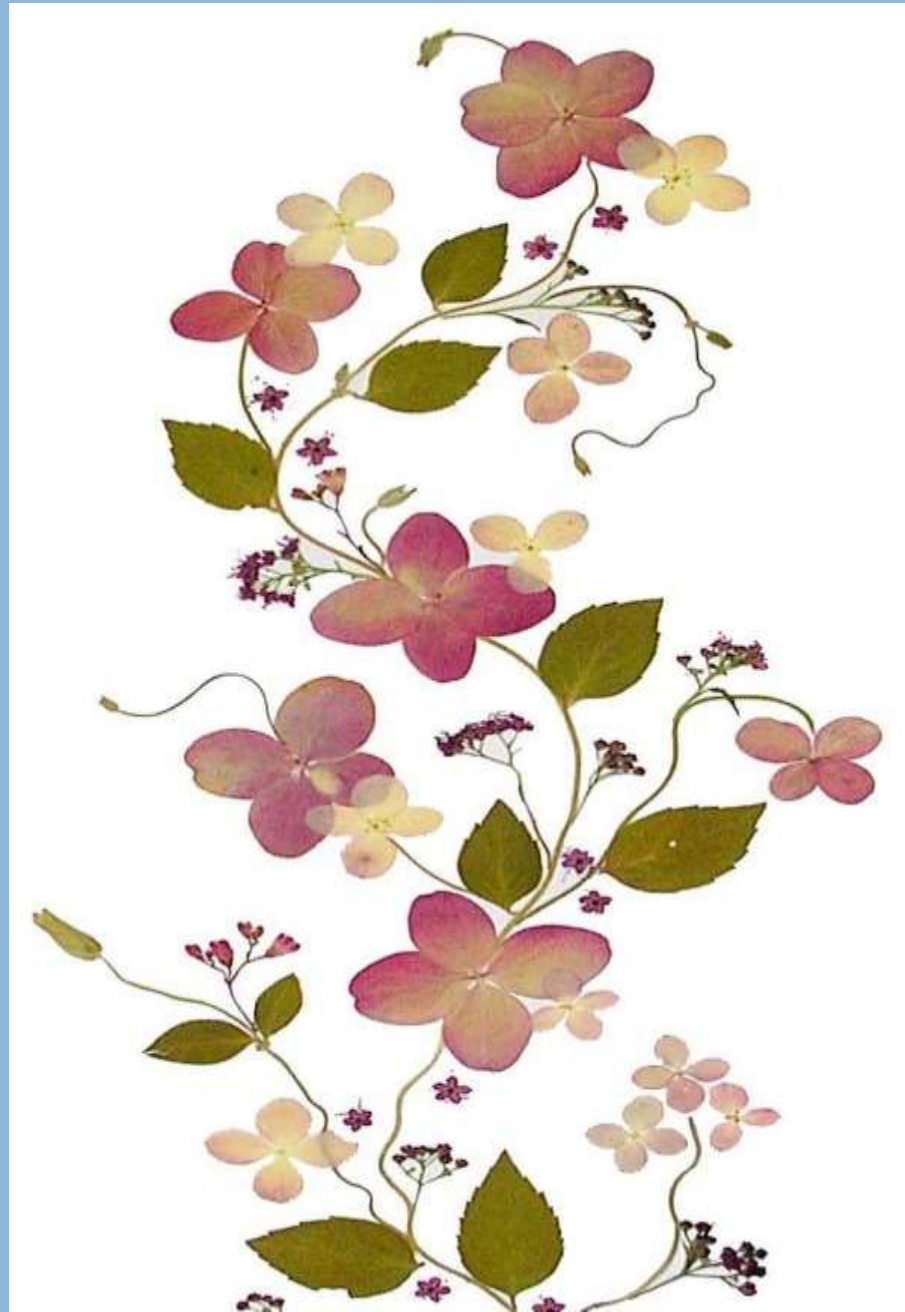

Using butcher paper or newspaper, cut a flower shape that is at least four feet in width, and lay it flat on the floor.

In the center of the flower place a cup of sugar water.

Sprinkle powder on the rest of the flower.

Give each child a straw and let them one at a time try to get the “nectar” from the cup without touching the “pollen” powder. Most flowers are pollinated successfully when an insect drinks the nectar, though sometimes insects are able to bypass the pollen

6. Make a bookmark using dried flower petals.

7. Take a bouquet of garden flowers to share with someone.
